

SOCIOLOGY SUMMER WORK: keeping an eye on the news

Please watch some news stories over the summer and choose one you think links to SOCIOLOGY.

Sociology includes the study of:

- **Identity:** factors such as social class, age, ethnic background and gender.
- **Inequality:** how the above factors may affect someone's life and create inequality.
- **Crime and deviance:** what social factors may contribute to crime, who is criminal?

In the summer of 2024, there were riots across the UK. This would have been an interesting topic to consider. I hope this will not be repeated in 2026 so please choose anything that interests you. Choose a news story that could relate to sociology, print it off and write a paragraph about it.
